# THE

# ELECTRICAL WORLD

A REVIEW OF CURRENT PROGRESS IN ELECTRICITY
AND ITS PRACTICAL APPLICATIONS

## VOLUME XLIX

JANUARY 5 to JUNE 29, 1907

NEW YORK:
ELECTRICAL WORLD

# INDEX TO VOLUME XLIX.

## GENERAL INDEX.

*Entries from the Digest of Current Electrical Literature are indicated by D. (Digest) and D. R. (Digest Reference).*

### A

Accident liability, President Roosevelt on, 1198
Accidents during 1907, 1256
Accounting, Uniform system of, 1161
Acetylene flame, Electric discharges in. By Lorenz, (D.) 603
Advertising. (See Central station business.)
Air compressors, Portable, 846
Air-gap ampere-turns. By Legros, (D. R.) 802, 907
Ajax Line Material Co., 271, 650
Alcohol engines as a future power. By Thomson, 2, 20
Alkali works, Electrolytic, at Niagara. By Baekeland, (D. R.) 1227
Allis-Chalmers Co., 110, 196, 316, 846
——Instruction for apprentices, 377
Alloys:
——Conductivity of. By Schenck, (D.) 960
——Magnetic properties of Heusler. By McLennan, (D.) 556
——Nickel alloys. By Hill, (D.) 556, 1118
——Production of, in the electric furnace, 760
——"Stalloy," (D.) 310
Alpha particles from radioactive substances. By Rutherford, (D.) 312
Alpha rays in gases and vapors. By Adams, (D.) 149
Alternating-current circuits, Graphical diagram for determining reactance in. By Varley, 301
Alternating-current curves, Analysis of. By Vavrecka, (D. R.) 1170
Alternating-current power factor. By Sumpner, (D.) 1117
Alternating-current rectifier. By Wehnelt, (D.) *192
Alternating-current service, Special field for. By Knowlton, (D.R.) 352
Alternating-current waves, Effect of iron in distorting, 289
Alternating currents:
——Calculations, Method of Boucherot, (D.) 396
——Converting into direct current. By Weiss, (D. R.) 600
——Measuring. By Koubitzki, (D. R.) 151
——Minimum-voltage relay, (D.) 1169
Alternators:
——Allis-Chalmers self-contained belted, *196
——Cost of, for various voltages, 745
——Design, Effect of rated speed on. By Hobart and Ellis, 1016; (D.) *1037, 1166, 1270
——Engine type, *1125
——Frequency, Raising, 900
——High-voltage. By Waters, 840
——Installation and operation of, *357
——Installing, Allis-Chalmers instructions for, *110
——Lamme motor with shunt motor characteristics, *293
——Magnetic leakage. By Cramp, (D.) 309, *393
——Magnetic oscillations. By Worrall, (D.) 645
——Self-regulating, with auxiliary field. By Heylard, 374, *386, (D.) 515
——Series vs. parallel windings. By Hellmund, 388
——Size and safety of turbo-alternators. By Kingsbury, (D.) 267
——Sparking prevention, Latour schemes, *306; By Lundell, 514
——Torque and starting current, 333
——Troubles. By Buchenberg, 442
——Turbo-alternator tests, (D. R.) 1167
——Turbo-alternators. By Heyland, (D.) 957
Altoona Edison Co., *235
Aluminum anode. By Corbino, (D. R.) 353
——Formation of the unipolar film. By Corbino and Maresca, (D. R.) 150
——Measurements of dielectric capacity and resistance. By Gordon, (D.) 150
Aluminum coils. By Hopfelt, (D.) 764
Aluminum compared with copper for electric conductors, (D.) 1118
American Association for the Advancement of Science, 9, 130
American Blower Co., 563
American Electrochemical Society, 825, 931, 939, 995
American Engine Co., 912
American Institute of Electrical Engineeers:
——Annual convention, 981, 1250
——April meeting, 865
——Boston branch, 138
——Chicago meeting, 1062, 1221
——Code of ethics, 1288, 1311
——Cornell meeting, 378
——Election of officers, 1022
——January meeting, 91
——New headquarters, 216
——Niagara convention, 1249, 1281, 1306.
——Purdue meeting, 175, 377, 582, 1063
——Schenectady branch, 132, 1065, 1250
American Institute of Electrical Engineers: (Continued.)
——Scope and work of the Society, 94
——Standardization rules, 130
American Instrument Co., 67, 1124
American Museum of Security, 782
American Society of Mechanical Engineers, 978, 1148
Ammeters, Induction. By MacGohan, (D.) *519
Anchors, Guy, *608
Anderson Mfg. Co., *154
Annealing steel by means of the electric arc. By Arnold, *52
Arc lamp industry, Status of, (D.) 600
Arc lamps:
——Davy enclosed, (D.) 763
——Enclosed, Review of. By Wedding, (D. R.) 909
——Flame:
Ediswan-Carbone, (D.) 763
Lewis. By Hatfield, (D.) *762
Magazine type, *64
New patent. By Blondel, (D.) 804
Thomson-Houston, (D.) 1038; *1274
——German Improvements. By Duschnitz, (D. R.) 804
——Helios luminous, *607
——Magnetic. (See Magnetite.)
——Metallic oxide lamps. By Little, 1143, 1162
——Photographic work with, (D.) 997
——Rating of, Colorado Springs, 373, 376, 673
——Short arc, *65
——Siemens carbon, (D.) 1038
——Standardization of arc lamps, 1057
——Standardization of, in Germany, (D.) 908
Arcs:
——Combination tones in singing. By Waltzmann, (D.) 1320
——High-frequency oscillations. By Austin, (D.) 1321
——Hissing point of metallic. By Cady, (D.) 1038, 1270
——Theory of singing arc. By Simon, (D. R.) 909
——Undamped oscillations. By Traubenberg, (D.) 1321
Armature banding arrangement. By Thompson, *700
Armature slot-cutting machine. By Hundhausen, (D. R.) 1318
Armatures:
——Alternating-current windings. By Hobart and Ellis, (D.) 192, 310
——Diameter, Estimation of. By Frendenberger, 144; Heinrich, 308
——Eddy current losses in teeth. By Meurer, 776, *792
——Injury to, by machine oil, 53
——Losses in. By Press, (D. R.) 106
——Notes. By Weeks, *38
——Peripheral speed, 703
——Reaction of armature in single-phase generators. By Sumec, (D. R.) 106
——Ventilation, *912
——Wobbling armature. By Hobart, 456
Arnold, B. J.:
——Accident to, 935
——Presidential address of, 133
Asbestos wood. By Norton, 835
Ashes, Washing. By Hobart, *897
Asia Minor, Electricity in, 748
Association of Railway Telegraph Superintendents, 1151, 1313, 1326
Atmospheric discharges, Protection against, (D.) 352
Atom, Constitution of. By Pellat, (D.) 1040
Austria, Electrical industries in. By Honigmann, (D. R.) 717, (D.) 764
Automobile Club of America, 825
Automobile garage, Washington, *1172
Automobile garage and repair shops of Philadelphia Electric Co., *874
Automobile garage combined with central station in Philadelphia. By Haden, *1120
Automobile show in New York, 202
Automobiles:
——Central station practice, 624
——Central stations and the electric vehicle, 664, *682; By Bertram, 907
——Electric ambulances in London, (D.) 1168
——Electric baggage truck, *1172
——Electric, for central station use, *1229
——Electric systems, Various. By de Valbreuze, (D. R.) 352
——Electric, in Washington, *1078
——Gasoline-electric, Belgian, (D. R.) 998
——Gasoline electric system for commercial vehicles, *766
——Petrol-electric, (D.) 149; By Hart and Durtnall, (D.) 352, *395; Valbreuze, (D. R.) 555
——Rockford, Ill., Electric vehicles in, 587
——Statistics of manufacture, 382
——Trolley automobiles for public service, *140
——Trucks for lighting companies, *35

### B

Babbit-metal melting rig. By Francis, *699
Balancers vs. three-wire dynamos. By Frankenfield, 1211
Ball & Wood Co., 605
Ballast resistances for voltage compensation. By Lauriol, (D.) 958
Ballast resistances of Nernst lamps as starting resistances for motors. By Kallmann, (D) *1319
Bates, D. L., & Co., 566
Battery plates, Negative, Treating, *627
Bearings and their lubrication. By Davies, 254
Beaver Dam Malleable Iron Co., 476
Bell telephone system, Statistics, 619, 622
Bell wiring, 53; By Frank, *455; Dimock, *435
Bending conduit. By Poppe, *1096
Benjamin Electric Mfg. Co., 357
Black diamond pointed tools, *67
Black sands of the Pacific Slope. By Day and Richards, (D. R.) 603
Blast furnace gas:
——Cost of electrical energy from, (D.) 764
——Power for a central station, (D.) 1167
——Railway operation by. By Junge (D.) 764
Bleaching liquors, (D.) 397
Bleaching solutions for paper pulp, Electrolytic. By Digby, (D.) 1000
Bliss, E. W., Co., *64, *66
Blowers:
——Buffalo, 564
——Motor-driven forge, *271
Boiler feed-piping. By Strohm, *252
Boiler feeders, Regulation of. By Towne, *449, *695, *891, *1098
Boiler setting, Air leakage in, 1106
Boilers:
——Blow-off pipes. By Francis, *895
——Design, Tendency of, 249
——Leaky blow-off valve and its cost. By Francis, *1104
——Loss in leaky settings, 886
——Oil burners. By Kavanagh, *889
Bolts, Toggle, *271
Bookkeeping for central stations. By Denholm and Maccall, (D. R.) 764
Book reviews:
——Alternating-Current Motors. By A. S. McAllister, 313
——Annuaire Pour L'An, 1907, 355
——Ban-und Betrieb von Kalte-Maschinenlagen. By C. Heinel, 648
——Bases D'Une Theorie Mecanique de L'Electricite. By Seligmann-Lui, 355
——Berechnung und Ausführung der Hochspannungs-Fernleitungen. By C. F. Holmboe, 648
——Betriebsmittel der Elektrischen Eisenbahnen. By E. C. Zehme, 471
——Boiled Waters. By W. W. Christie, 717
——Combustion and Smokeless Furnaces. By Hayes, 845
——Construction des Machines Electriques. By Julien Dalemont, 844, 1119
——Dangers of Municipal Ownership. By R. P. Porter, 717
——Economics of Railroad Instruction. By W. L. Webb, 1171
——Electricité a L'Exposition de Liège. By J. A. Montpellier, 355
——Electrolytische Alkalichlorid-Zerlegung. By R. Lucion, 397
——Elektrischer Energie. By G. Siegel, 806
——Electro-Ingenieur-Kalender. By A. H. Hirsch and F. Wilking, 558
——Elektrolyse Geschmolzener Salze. By R. Lorenz, 471
——Electron Theory. By E. E. Fournier d'Albe, 195
——Elementary Electrical Engineering. By J. H. Alexander, 355
——Elements of Gas Engine Design. By S. A. Moss, 717
——Entropy. By J. Swinburne, 558
——Entwurf von Schaltungen und Schaltapparaten. By Robert Edler, 844
——Fields of Force. By W. F. K. Bjerknes, 356
——Fortschritte in der Anwendung der Routgenstrahlen. By Joseph Rosenthal, 1648
——Fowler's Mechanical Engineer's Pocket Book, 845
——Gas and Oil Engines. By Horace Allen, 845
——Gleichstrom Maschine. By E. Arnold, 648
——Gold Mining Machinery. By W. H. Tinney, 1119
——Handbuch der Elektrotechink. By Pohl & Soschinski, 604
——Ice Formation. By H. T. Barnes, 806
——Looking Forward. By H. W. Hillman, 558
——Navigating the Air, 1229
——Practical Testing of Dynamos and Motors. By C. F. Smith, 806

* indicates illustrated articles.

168856

Book reviews: (Continued.)
——Précis D'Electricité. By Paul Niewenglowski, 355
——Quasi-Public Corporation Accounting and Management. By J. F. J. Mulhall, 912
——Schalttafelbau. By A. Boje, 1040.
——Six-Chord Spiral. By J. R. Stephens, 1001
——Slide Rule. By C. N. Pickworth, 717
——Steam-Engine and Other Steam-Motors. By R. C. H. Heck, 648
——Steam Turbines. By L. G. French, 1171
——Steel Square as a Calculating Machine. By A. Fair, 912
——Tables for the Computation of Illumination. By W. E. King, 961
——Technik des Lastenforderung. By Kammerer, 648
——Telegraphes en Europe. By E. Guarini, 1001
——Theoretische Elektro-chemie. By H. Dannell, 521
——Uber Elektronen. By W. Wien, 558
——Wissenswertes ans dem Dynamotan für Installature. By E. Shulz, 604
Booster, Entz reversible, (D. R.) 713
Brakes:
——Eddy-current testing, (D.) 470
——Self-regulating. By Scheibe, (D.) *520
Breakdowns of electrical machinery. By Foster, (D.) 712
British Thomson-Houston Co., 766
Brooklyn Edison system, Development of, 418, 464
Brush holders and brushes for 500-volt motors. By Parham, *694, *885
Brush setting on rectifiers. By Mulford, 48
Brushes:
——Copper-graphite, for dynamos, 798
——Drop of pressure at commutator contact, 861
——Transition resistance of carbon brushes as function of temperature. By Arnold and Pfiffner, (D.) 802
Buckstays for boilers. By Scott, *702
Buffalo Steam Pump Co., *113
Bulletins, Central station, Value of. By Beckwith, *704, 1112
Burning bituminous slack and lignites. By Hutchins, *45
Burning fine anthracite coal. By Strohm, *893
Burns, John, 226
Burton bill and its effect on electrical developments at Niagara Falls, 1291
Buschmann & Griffey Co., 356

## C

Cable splicing machine, *914
Cable terminals, Metal, *1125
Cables:
——Capacity, Measuring. By Akemann, (D.) 194
——Depreciation of underground, Estimation of. By Fernie, (D. R.) 1118
——Effective capacity of. By Akermann, (D.) 518
——Flexible conductors. By Schwartz, (D.) 999, 1118
——High-tension, Experiments in Italy, 171, *183
——Laying methods, (D.) 959
——Review of development of. By Jacquin, (D. R.) 62
——Testing, Guarding for, (D.) *766
——Tests with telephone currents. By Gati, (D.) *1000
——Three-core cable vs. three single cables. By Fernie, (D.) 1170
Cables, Submarine:
——Colon cable, 1298
——Historical notes. By Mullaly, (D. R.) 648
——Mediterranean, New, 944
——New York, Cuba and Colon, 290
——New York to Porto Rico, 94
——Testing joints. By Johansen, (D.) *1169
Cables, Telephone:
——Bavarian Mts. By Hintermayr, (D. R.) 1001
——Loaded, across Lake Constance, (D.) 1228
——On transmission line poles, 261
Cahoon, J. B., Death of, *378
Calcium, Metallic, Producing. By Escard, (D. R.) 1228
Calcium cyanamide. By Carlson, (D. R.) 353
Calibration: recalibration of electrical instruments. Ramakers, (D.) 270
Canada. Hydro-Electric Power Commission, 1152
Canadian Niagara Power Co., *1299
Canadian power export, 135
Canal haulage, Electric:
——Different methods. By Thwaite, (D. R.) 311, 352
——Discussion. By Gerard, (D.) 61
——Doual, France, (D.) 107
Candle-power, Mean. By Herzog and Feldmann, (D.) 467
Candle-power, Measurement of horizontal. By Uppenborn, 536; (D.) 555; (D. R.) 1114; Hyde and Cady, (D.) 908, 1260
Candle-power diminution in frosted lamps, Analysis of causes of. By Millar, 777, 798
Capacities, Comparison of. By Kester, (D.) 151
Car lighting. (See Lighting, Train.)
Car meters in Europe. By Wattmann, (D.) 1271
Carbon brush holders. By Mills, (D.) 267
Carbonator, Single-phase, motor-driven, *649
Carbons:
——Kufferath patent, 104
Carbons: (Continued.)
——Life of filament on varying voltages, 1147
——Siemens patent, (D.) 1038
——Straightness of carbons. By Richter and Haeser, (D.) 1114
——Utilizing broken pieces of, 53
Carborundum, Note on. By Round, 309
Card record system for a central station. By Martin, 680
Cars:
——Control of, on tramways, (D.) 646
——Equipping with electrical apparatus. By Emanuel, (D. R.) 61
——Regenerative control of. By Raworth, (D.) 108
——Various types of motor cars. By Poschenrieder, (D. R.) 646
——Vienna-Baden railroad (D. R.) 108
Carson, G. S., *825
Cathode ray tube for magnetic tests. By Madelung, (D.) *715
Cells:
——Clark and Weston, Investigation of. By Guthe and von Ende, (D.) 557
——Jacques carbon cell. By Patterson, (D.) 270
——Standard cells. Researches of Hulett. By Guthe and von Ende, (D.) 151
——Weston and Clark, Constancy of standard. By Wolff and Waters, 81, 100
Cement works, Electric power in, (D.) 1167
Central station ailments, 888
Central station business:
——Advertising:
Binghamton, N. Y., 461
Cleveland advertising, 178
Clever, in Dayton, Ohio, *904
Does it pay? By Beckwith, *458
Misdirected efforts, 81
Newspaper advertising, *905
St. Louis, Union Electric Light & Power Co., 436
——Advertising the impracticable, 219
——British business getting methods, 59
——Bulletins. Do they bring results? By Beckwith, *1704, 1112
——Capital changes, depreciation and rating. By Miller, (D. R.) 108
——Card record system. By Martin, 680
——Chicago's central station increase, 500
——Cincinnati, New business department, 903
——Combined gas and electric company, New business department of. By Stuart, 906
——Commercial development. By Matthews, (D. R.) 149
——Cost of electrical energy, Estimating. By Kramer, (D. R.) 149
——Cost of Operation in Iowa, 824
——Development in 1906, 6
——Discussions at N. E. L. A. convention, 1215
——Economics in central station practice. By Taylor, (D.) 602
——Factors to strive for, 218
——Germany, Financial results. By Dettmar, (D.) 61
——Great Britain, Needs in central station management, (D.) 603
——Growth of business, Fair, 288
——Heating campaigns, *708
——Isolated plant as non-peak load, 331
——Lamp renewals, Control of, 288
——Management of supply station, (D.) 764
——Non-peak sign and window lighting, 862
——Organization and conduct of a new business department. By Sampson, 56; 462; Standard, 1109
——Organization and operation of hydro-electric power plants. By Osgood, 511
——Phases of smaller central station management. By Scott, 189, 218
——Sale and handling of domestic electric appliances, 56
——Schemes for increasing business, 707
——Seashore service of Queens Borough Gas & Electric Co. By Beckwith, *1107
——Sheboygan, Wis., Theater-curtain advertising, *1109
——Slang, Use of, in advertising. By Mann, 60
——Small station financing, 416
——Special offers to create business, 416
——Suggestions for new business, 859
——Technical graduates and central stations. By Shepardson, 29; 56, 170, 216; Eglin, Jackson, Wells, Norris, Frueauff, Langsdorf, Carson, Caldwell, Brooks, 220; Spinney, 350; Doherty, 580, 596
Central station economy, 955
Central station operator, Suggestions for. By Weeks, 887
Central-station prosperity, 1059
Central stations:
——Altoona, Pa., Citizens' Electric Light, Heat & Power Co., *139
——Altoona, Pa., Edison Co., *235
——Austria, Statistics. By Rosenbaum, (D.) 1115
——Automobile as an adjunct to central station loads. By Rice, 1212
——Blast furnace gas power, (D.) 1167
——Brooklyn Edison Co., Coal handling and condensing equipment, *1201
——Chicago drainage canal plant, *757
——Cincinnati, Improvements, 877
——Combined electricity and destructor works. By Abraham, (D.) 395
——Commercial development of central stations. By Baumann, (D.) 1271
——Crawford, Neb., Small station. By Ward, *633
——Depreciation in stations. By Hammond, (D.) 1119
——Design and operation. By Hollis, (D.) 469; Dixon, (D. R.) 555
Central stations: (Continued.)
——Distribution loss, Analysis of, 1263
——French water power stations. By Montpellier, (D.) 268
——Gas engines. By Bibbins, 1209
——Gas engines, at Friedenau. By Mulertt, (D. R.) 910
——Gas engines, Producer, for central stations. By Lozier, 1210
——Geneva, (D. R.) 909
——Geneva, steam plant, (D.) 395
——Germany:
Berlin suburb. By Mulertt, (D.) 518
Rathenow. By Willie, (D. R.) 910
Statistics, (D.) 998
Westphalia, (D.) 763
——Gt. Britain, Statistics, (D.) 193, 312
——Harrisburg, Pa., Traction Company, *829
——Haverhill Electric Co., *545
——Hinsdale, N. H., Hydro-electric development, 629
——Holyoke, Mass., Report, 544
——Illuminating engineering in central station work. By Edwards, 1092
——Johannesburg, S. A., (D. R.) 108
——Johnstown, Pa., Citizens' Light, Heat & Power Co., *15
——Kingsland shops of D., L. & W. R.R., (D.) 149
——La Grange, Ill., Pumps, 217, *240
——Livet station. By Reyval, (D.) 1116
——London:
Charing Cross, (D. R.) 1168
Connections to supply stations, (D.) 312
St. Marylebone, (D.) 311
Stepney station, (D.) 1168
Various stations. By Pearson, (D.) 469, 517, 555, 602, 646, 713, 910, 1168
——Lynchburg, Va., Arc lighting plant, *789
——Malden Electric Co., *832
——Marysville, Ohio, 878
——Melbourne, Statistics for 1906, (D.) 108
——Mooresville, Ind., Public Service Co., equipment, *242
——Mount Union Light & Power Co., *305
——New Zealand, small stations. By Priestley, 35
——New Zealand, at Christchurch, (D.) 603
——Nice, Curtis steam turbines, (D.) 395
——Norfolk & Portsmouth Traction Co., *1084
——Ohio station destroyed by wind storm, *782
——Pacific Light & Power Co., Test of plant, 1061
——Paris, St. Denis station (D. R.) 269
——Paris supply situation, (D.) 713, 910
——Paxtang Electric Co., Harrisburg, Pa., *339
——Phil., Combined station and garage. By Haden, *1120
——Potomac Electric Power Co., Wash., D. C., Generating and sub-stations, *1067
——Russia, Statistics, (D.) 1116
——Shawinigan Falls. By Johnson, (D. R.) 645
——South Norwalk, Co., Municipal plant, *678
——Southern Power Co., on the Catawba River, 1016, *1025, 1166
——Spokane & Inland Empire R.R. Co., *504
——Steam turbines, Direct-current plant at Munich, *797
——Sweden, at Trollhattan, 294
——Switzerland, Developments in. By Bignani, (D. R.) 352
——United Electric Co., Lemoyne, Pa., *501
——Voltage of supply, effect of new metallic filament lamps. By Wikander, (D.) 602
——Wash., D. C., Government buildings, *1076, *1153
——Water pumping by central stations, La Grange, Ill., 217, *240
——Worcester Electric Light Co., 142
——York, Pa., Edison Electric Light Co., *871
——York, Pa., Merchants' Electric Light, Heat & Power Co., *985
Centrifugal force. By Siedek, (D.) 997
Century Electric Co., 566
Chain drive, Renold silent, *1173
Charging for electric current:
——Boston Edison rates, 1062, 1297
——Boston methods of computing rates, 1090
——Chicago energy rates, 742
——Cincinnati, 904
——Differential rates, 1162
——Discussion by Toppin, (D.) 311; Hartwell, 466
——Doherty readiness-to-serve system, 457, 1087
——Fixed charges and rates. By Thornton, 957
——Flat-rate service, 1089
——Heating and cooking, 131, 1090
——Indiana, Bill in Legislature, 424
——Italian methods, 1213
——Kyoto, Japan, 582
——Maximum-demand meter system, 1088
——Minneapolis, experience in. By Estep, 1108
——Modern rate systems, 1056
——Mooresville, Ind., 242
——Multiple-rate systems, 1088
——Municipal vs. company charges, (D.) 1039
——New lamps and the small station. By Forest, 685
——Principles of modern rate-making for electric light and power, 1086
——Rates in various cities, 1089
——San Francisco lighting rates, 539
——Sault Ste. Marie, heating and cooking rate, 137
——Syracuse rates, 631
Chase-Shawmut Co., 913, 1126, 1325
Chicago Electrical Show, 92, 114, 135, 169, 200, 273
Chicago Fuse Wire & Mfg. Co., 1275
Chicago Pneumatic Tool Co., 65, 1275
Choke coil defined, 703
Chronograph for recording engine speed variations, (D.) 109

*** indicates illustrated articles.**

Circuit breakers:
——Cutter, *199
——Single or double- pole, with generators running in parallel, 1106
Civil service examinations, 1297
Clark cells, 100
Clock and telegraph, Electric, (D.) 354
Coal:
——Burning bituminous slack and lignites. By Hutchins, *45
——Burning fine anthracite. By Strohm,
——Characteristics of. By Abbott, (D. R.) 352
——Consumption in large cities, 378
——Production, geology, mining. By Schellenburg, (D.) 395
——Pumping from Susquehanna River, *448
——Specifications, U. S. Government, 663, 670
Coal cutting, Electric, (D.) 149
——Design of 12-in. induction. By Eddy, *40, 228, *244
Coal handling and condensing equipment in station of Brooklyn Edison Co., *1201
Coaling tower, (D. R.) 269
Code of ethics of A. I. E. E., 1288, 1311
Coherence, Theory of. By Jegon, (D. R.) 1000
Coils:
——Calculating magnet coils. By Edler (D. R.) 151, 310, 554
——Design of induction. By Ehnert, (D. R.) 1040, 1170, 1228
Color values of artificial illuminants, 980
Colorado Springs lamp controversy, 373, 376, 673, 821, 823
Colors of the new illuminants, 289
Commercialized electrical engineering, 90
Commutating poles in direct-current machinery, 932, *952
Commutation:
——Differential equation, Methods for solving. By Linsenmann (D.) 1166
——Phenomena of. By Bailey and Cleghorne, (D.) 106
——Problems in. By Walker and Dodd, (D.) 1037
Commutator compounds, 53
Commutators:
——Connections, (D.) 466
——Mercury interrupter as commutator. By Zenneck, (D.) 1170
Compensator, Voltmeter, for direct-current circuits. By Haskell, *1031
Condensers:
——Brooklyn Edison station *1205
——Condensers in distribution systems. By Guilbert, (D.) 149
——Construction and uses of high-tension. By Schmidt, (D.) 1228
——Evaporation, Use of where water is scarce, 1106
——Features of installation and operation, 47
——Influence of, in the secondary circuit of a transformer. By Brenot, (D.) 762
——Leblanc jet condenser, (D.) *61
——Paraffined paper. By Dearlove and Sayers, (D. R.) 805
——Rate of recovery of residual charges. By Trouton and Russ, (D. R.) 805, 1040
Conduction, Electric, 940
Conductivity, Electric, Produced by heating salts. By Garrett, (D.) 1320
Conductivity for heat and electricity. By Koenigsberger, (D.) 999
Conductivity of alloys. By Schenck, (D.) 960
Conductivity of air, Change of. By Gates, (D.) 556
Conductors:
——Economical section. By Baum, 1017, 1029
——New observed forces within an electric; Observations by Carl Hering, 492, 513
——Testing the charged condition of (D.) *518
Conduit clamp, Pass & Seymour, *1042
Conduits:
——Bending. By Poppe, *1096
——Drawing conductors into. By Poppe, *883
——Flexible metallic, in frame dwelling. By Poppe, *247
——Installing feeder, in fire proof buildings. By Poppe, *445
Contact plug, New form of mercury, (D.) *109
Contacts, Gold for, 53
Controllers:
——Crane service, *474
——Printing press, *65
——Variable-speed motor, *847
Converters:
——Motor-converters, Constructional features, 329, *348
——Rotary converters. By Walker, (D.) 108
——Rotary converters vs. motor generators. By Lincoln, 801
Cook, Frank B., Chicago, 271
Cooking by electricity:
——Charging rates, 131
——Discussion by P. A. Bates, 31
——Experiences, by J. R. Cravath, 416, *432
——Grinnell, Iowa, 55
——Notes, 1124
——Oak Park, Ill., experiences, *710
——Sault Ste. Marie, Rates, 137
Co-operative Electrical Development Association, 8, 1214
Copper:
——Comparison of aluminum and copper for electric conductors, (D.) 1118
——Consumption. By Buerner, (D.) 151
——Demand and supply. By Welbourn, (D.) 520
——Price and production. By Kershaw, (D.) 961
——Resistivity-temperature formulæ for. By Crocker, 374, 385; Jasse, (D.) 999; Glazebrock and Kloss, (D.) 1039
Copper-graphite brushes for dynamos, 798
Cord, Tests of flexible, 315
Cornell University, Electric railway engineering at, 937
Cost calculations, (D.) 844
Cost of electrical energy from blast-furnace gases, (D.) 764
Cost of electrical energy, Methods of estimating. By Kramer, (D. R.) 149
Cost of Iowa central stations, 824
Cranes:
——Electric, Boston freight terminal, 1312
——Electric, Nuremberg, in 1906. By Hundt, (D. R. 469
——Modern, for harbor work, *184
——Single-phase equipment at Cologne-Dentz dock, *141
Crocker-Wheeler Co., 914
Cut-outs, Film, Ferguson, *988
Cutler-Hammer Mfg. Co., 847
Cutter Co., 199
Cymometer, Fleming direct-reading, (D.) *270, 313

## D

Damascus, Electricity in, 748
Dams, Irrigation and hydro-electric power, 1146
Danger from direct current and alternating current. By Danneel, (D.) 1274
Decorations, Electrical, Hints. By Kavanagh, *246
Deflection in wire spans. By Pender, 85, 99
Deflection instrument. By Northrup, (D.) *557
Diagram of reactance voltage, 302
Diehl Mfg. Co., 561
Dielectrics, Solid. By Malcles, (D.) 765
Dielectrics of condensers and cables, Energy loss in. By Monasch, (D.) 1039
Direction of current in a conductor moved in a magnetic field, Rule for finding. By Steen, *896
Dissipation of electricity. By Koenigsberger, (D.) 396
Distribution losses in a large central station, Analysis of, 1263
Distribution systems, Electric. By Ford, 836
Dock, Electric equipment of, at Clydebank, (D.) 1115
Drawing conductors into conduit. By Poppe, *883
Dredges, Motor-driven, 807
——Electric, on the Weichsel River. By Meiners, (D. R.) 107
Drills:
——Midget rotary, *65
——Siemens electric rock, *113
Dust exhauster, Electric, *609
Dynamite cap, Electric, 900
Dynamometers:
——Calibration of, for submarine telegraphy. By Bayol, (D. R.) 104
——Differential electro. By Tellier, (D.) *519
Dynamos:
——Direct-current design as influenced by interpoles. By Page and Hiss, (D. R.) 1270
——Homopolar, 703
——Interpole, Principles of. By McMullin, (D. R.) 1318
——Interpoles and commutation. By Page and Hiss, (D.) 1318
——Invention of the self-exciting dynamo, (D. R.) 351
——Iron losses in non-synchronous machinery. By Wall, (D.) 600
——Leakage factor, Determination of. By Pohl, (D.) *1224
——Rosenberg three-wire, *785
——Theory and construction of interpole machines. By Peliken, (D.) 267
——Testing direct-current. By Soulairol, (D.) 515
——Three-wire dynamos vs. balancers. By Frankenfield, 1211
——Troubles in an isolated plant. By Mulford, *256
——Voltage between segments. By Oelschlaeger, (D.) *644

## E

Ear. Absolute sensitiveness of. By Abraham, (D.) 1321
Earthquake at Jamaica, 177
Eddy current losses in armature teeth. By Meurer, 776, *792
Edison Club of Schenectady. By Feiker, *314
Edison Electric Illuminating Co., of Brooklyn, *704
Elastic constants, Charge of, by magnetization. By Honda and Terada, (D.) 269
Electric Carriage Call Co., 397
Electric Controller & Supply Co., 474
Electric Diamond Machine Co., 317
Electric discharge through hydrogen and oxygen. By Kirkby, (D.) 647
Electric discharges, Photographs of, *238
"Electric Jingles," *706
Electric Machinery Co., 1125
Electric Safety Appliance Co., 472
Electric waves, Reflection and transmission by resonator grating. By Schaefer, (D. R.) 1272
Electrical code, National, 498
Electrical Contractors' Association of Indiana, 132
Electrical engineering. By Latour, (D.) 911
——Commericalized electrical engineering, 90
Electrical Engineering: an English weekly journal, 135
Electrical industry:
——Growth in 1906, 2, 86
——Industry in continental Europe, (D.) 63
——Matters in 1874, 413, 419
Electrical industry, Statistics of development, 1060, 1159
Electrical law, English. By Britton, 304
Electrical quantity and energy, Diagram of. By Kuhn, (D.) *646
Electrical Salesmen's Association, 136, 220
Electrical Workers' Club of the Pittsfield Electric Co., 136
Electricity:
——Cost of, obtained from water, steam, gas and oil, 421
——Lower cost of, 459
Electrochemical developments, 146, 306, 392; By Izart, (D. R.) 519, 597, 760, 843
Electrochemistry in 1906, 87. By Kershaw, (D.) 519
Electrochemistry, Problems in, 291
Electrolysis:
——Alkali chloride. By Steiner, (D.) 1000
——Alternating-current and direct-current railway systems, 493, 495
——Mixed aqueous solutions. By Rosset, (D.) R.) 557, 1000
——Soil. By Bassett, (D.) 961
Electrolytic alkali and bleach industry. By Kershaw, (D.) 805
Electrolytic wave detector. By Armagnat, (D.) 194
Electromagnetic theory. By Nicholson, (D. R.) 556; Bucherer, (D.) 843
Electrometallurgy. By Kershaw (D. R.) 1040
Electrometallurgy of iron and steel. By Richards, (D.) 960.
Electrometers:
——Sensitive pointer. By Dolezalek, (D.) *151
——Static. By Wulf, (D.) *960
Electron theory. By Millikan and Winchester, (D.) 193; d'Albe, (D. R.) 354; Schott, (D.) 556; De la Rive, (D. R.) 556; Thomson, (D. R.) 765, 776; Wolfke, (D. R.) 960; Sheldon, 1300
Electrons and canal rays. By Schott, (D.) 1320
Electroplating apparatus, *1003
Electrotherapeutics. By Hanauer, (D.) 1322
Emery grinder, Stow direct-connected, *154
Empire State Gas and Electric Association, 337, 1149
Employers' Liability Insurance, 624
Employes. (See Labor.)
End-cell switch indicator, A new. By Radtke, *752
Engineering education. By Behrend, 2, 25, 267; Waters, 266
Engineering Index, 136
Engineering profession. By Karapetoff, (D.) 717
Engineering Societies Building, 542, 668, *675, 745, 775, 778, 820, 822
Engineering Societies' commemorative medal, *864
Engineers:
——Code of ethics, 1288, 1311
——Illiterate, 1199
Engineers' Club, New York, Opening of, 868
Engines:
——Russell, *112
——Selection of. By Chase, 993
——Speed variations, Measurement of, (D.) 109
English electrical law in 1906. By Britton, 304
Equalizer connections, 53
Ether, Density of. By Lodge, (D.) 843
Evansville Electric Plow & Traction Co., 1018
Exciter troubles. By Buchenberg, 880
Export trade, 5, 491

## F

Fairmount Electric Mfg. Co., 476
Fans, Electric:
——Bates, *566
——Century ceiling, *566
——Colonial, *566
——Diehl telephone booth, *561
——Disc ventilating, *563
——Emerson, *564
——Fidelity, *565
——General Electric, *562
——Jandus, *566
——Lundell, *563
——Peerless, *561
——Robbins & Myers, *562
——Shutter for, *521
——Sturtevant steel plate, *565
——Use of, the year round, 5, 34
——Watson ventilating, *566
——Western Electric, *915
——Westinghouse, *564
Fans, Hot-air, in India, 1256
Farrand, Dudley, *1197
Faults, Localization of. By Toppin, (D.) 1118
Faults in new electrical machinery. By Channing, *257
Feed-piping for boilers. By Strohm, *252
Feed-water heater, Piping. By Simpson, *49
Feeder regulation, Methods of, *718
"Feeders" and "mains," 703
Ferro-alloys, Manufacture in electric furnace. By Hutton, (D.) 193
Ferromagnetism theory. By Gans, (D.) 1227
Fidelity Electric Co., 565
Field, Pulsations of the, in teeth. By Bragstad, (D.) 310
Field magnets for dynamos, Parsons and Law patent, (D.) 1038
Film cut-outs, Ferguson, *988
Films, Passage of electric waves through. By Blair, (D.) 647
Filters for lubricating oil. By Grant, *43, *250
Fire alarm system. By Lindenberger, (D. R.) 1320
Fire hazard of electricity, Report of N. E. L. A., 1160, 1192
Fire record of National Fire Protection Association, 584
Fires caused by electricity and gas, 984. By Dettmar, (D.) 1274

* indicates illustrated articles.

Fixation of atmospheric nitrogen. By Erlwein, (D. R.) 313, 556
Flame standards. By Perot and Janet, (D.) 109
Flat rate controller, Universal, *197
Flicker and variations in illumination, 1208
Floods and Ohio River power plants, 742
Floor polisher, Electric, *63
Fog chamber. By Barus, (D. R.) 647
Foreign Trade Convention, 175
Forest reserves, Southern Appalachian, 14
Forestry and water powers, 621
Formosa, Developments in, 1022
Foundry, Electric smelting for. By Moldenke, (D.) 396
Franchises, Short, objectionable, 787
Franklin Fund, Boston, 1063
Frequency changers. By Jollyman, 693
——Vertical, *152
Fuel economy. By Maxwell, (D.) 148; Goodrich, (D.) 602
Fuel-testing report on St. Louis plant, (D.) 63
Fuels for steam making. By Strohm, 447
Furnaces, Fan motor arrangement for. By Cravath, *34
Furnaces, Electric:
——Bristol, 9
——Burning fine anthracite coal. By Strohm, *893
——Foundry industry and. By Moldenke, (D.) 396; Bennie, (D. R.) 557
——Héroult furnace. By Eichhoff, (D. R.) 313
——Iron and steel metallurgy (D.) 270
——Kjellin tilting furnace. By Roechling (D. R.) 603
——"Pinch" phenomena, 941
——Steel furnace at Voelklingen, Germany, (D.) 960
——Summary of methods in iron and steel production. By Kershaw, (D. R.) 313, 397, 603, 843, 1170
——Theory of, 306
——Various patents, 597
Fuse carriers, 5000-volt, at Detroit, *551
Fuse indicator, (D.) *713
Fuses:
——Neutral of three-wire systems, 866
——Non-arching muffled, *423
——Notes on. By Meyer, (D.) 999, 1118
——Paard new fuses, (D. R.) 1272
Fusion and firing of refractory materials. By Hutton, (D.) 353

## G

Gail-Webb Mfg. Co., *66
Galvanometers:
——Alternating-current. By Armagnat, (D.) *911
——Alternating-current, Kelvin modified. By Franklin and Freudenberger, (D.) *150
——Highly sensitive. By Salomonson, (D.) 805
——Suspension for, (D.) *109
Garvin Machine Co., 560
Gas:
——Analysis for steam users. By Kershaw, (D.) 61, 107
——Consumption in large cities, 378
——Production of water gas. By Jüptner and Nagel, (D. R.) 268
Gas engines:
——Blast furnace gas, 271
——Central station work. By Bibbins, 1209
——Design of gas producers and gas engines. By Mathot, (D. R.) 1227
——Evolution of. By Schoettler, (D. R.) 61
——Igniter indicator for producer engines. By Dow, *52
——Ignition improvements. By Bibbins, (D. R.) 713
——Jager direct-connected, *317
——Milan Exposition. By Russmann, (D. R.) 195
——Power plant considerations. By Dixon, (D. R.) 311
——Producer gas engines for central stations. By Lozier, 1210
——Test of producer gas engine, 955
——Tests of producer gas engine. By G. W. Bissell, 9
Gas plants, Suction. By Stevens, (D. R.) 311
——Suction gas plant vs. steam, (D.) 1115
Gas power:
——Comparative cost of. By Campbell (D.) 517
——Plants in Italy, (D.) 468
——Practice and theory. By Douglas, (D.) 555
Gas producers:
——Plant details. By Porte, (D.) 351
——Power plant considerations. By Dixon, (D. R.) 311
——Suction, Tests of, (D.) 268
Gas-testing apparatus. By Kershaw, (D.) 61
Gasoline plants:
——Reason for existence of, 863
——Shutting down of, 984
Gearing motors to machinery. By Spence, (D.) 1115
General Electric Co., 64, 152, 398, 562, 721
——Annual report, 978
——Exhibit at Jamestown, 845
Generators:
——Circulating currents in three-phase. By Grier, (D. R.) 90
——Compound-wound motor-generators. By Wallace, 640
——Difference between direct-current generators connected in multiple, 703
——Direct-current turbo-generators. By Hoult, (D.) 148
——Expanding bore of field. By Shear, 456
——Installation of compound-wound. By Malford, *51
——Insulation of, from the ground, 1106
——Motor generators vs. synchronous converters. By Lincoln, 620, 626
——"Non-stop run," *1173
——Phasing two generators, 457
Generators: (Continued.)
——Speed changes, Determining small rate of. By Young, *551
——Starting motor-generator sets. By Bunce, 701
——Steam turbo-generator, Aurora, Ill., *1003
——Synchronous apparatus for improving power factor. By Lincoln, (D.) 269
——Three-phase, for direct coupling with steam turbine. By Tolben, (D.) 192, 395
——Troubles with direct-current machines. By Eager, (D.) 1114
——22,000-volt generators discussed by Behrend, 621
——Turbo-dynamo, Parsons, Test, (D.) 910
——Voltage drop when load is cut off, 900
——Westinghouse turbo-generators, 196
German electrical engineers' convention, 1145
German Reichsanstalt report for 1905, (D.) 108
Germany:
——Electrical development in, 628, 1063
——Electricity and gas in. By Dettmar, (D.) 1227
Glue pots, Electric, in a bindery, 1041
Gold, Electrolytic precipitation of. By Izart, (D. R.) 519
Gould & Eberhardt, 560
Gould Storage Battery Co., 608, 649
Graham Bell memorial, 424
Grand Rapids Pulp & Paper Co., Electrical equipment, *1040
Graphite lubricant, 961
Great Western Power Co.'s operations, 742
Greenwood Mfg. & Supply Co., *65, 197
Griffin, Gen. Eugene, Death of, 781
Grinders:
——Duntley electric, *1275
——Hand-driven carborundum, *317
Ground detector for three-phase circuits. By Conrad, *898
Grounds:
——Locating, in alternating-current motors. By Work, *1101
——Peculiar motor ground. By Chilton, *50
——Quick locating of, 1106
Guard ring for cable testing, (D.) *766
Guy anchors, *608
Gyroscopic mono-rail traction system, *1265

## H

Halsey Electric Generator Co., *153
Harrisburg Capitol, Lighting of, *229, 587, 632
Harter, G. H., *113
Hartman Circuit Breaker Co., 66, 721
Heat coefficient of magnet coils. By Lister, (D.) 148
Heat engines, Efficiency of. By Hart, (D.) 468
Heating, Electric. By Barr, 34; Lauri, (D.) 844
——Application to fusing. By Hutton, (D.) 353
——Discussion at Iowa convention, 950
——Call for current in. By Wood, 459
——Introduction of devices by central stations, *708
——Notes. By Wood, Jr., 1208
Heating from exhaust and from live steam, 900
Heating of copper wires by electric current. By Kennelly and Shepard, 1306
Heating of machine coils. By Ott, (D. R.) 712
Helios Mfg. Co., 607
Helium in springs, 1296
High voltages in power transmission, 741
Hoist, Sprague induction motor trolley, *768
Holophane Co., 720, 1002
Holtzer-Cabot Electric Co., 1232
Horse-power chart. By Sturgess, 698
Hospitalier, E., Death of, 743
Hysteresis and permeability of iron in relation to frequency. By Schamet, (D.) 1227
Hysteresis curve, Formulas for. By Müllendorff, (D.) 999
Hysteresis of iron, Magnetic effect of high-frequency currents. By Battelli and Magri, (D.) 843

## I

Ice manufacture in connection with central stations, 905
Ignition, Electric. By Davenport, (D.) 557
Ignition system, High-tension magneto, *272
Ilg Electric Ventilating Co., 521
Illuminating engineering in 1906, 85
Illuminating engineering in central station work. By Edwards, 1092
Illuminating Engineering Society, Meetings, 132, 173, 332, 377, 540, 641, 783, 824, 1018
Illumination, Rise of. By Norman, 1146
——(See also Lighting.)
Impulsive motion of electrified systems. By Searle, (D.) 269
Incandescent lamp fixtures:
——Adjustable, *66
——Greenwood, *197
——Harter cast glass, *113
——Stayright, *558
Incandescent lamp guards:
——Greenwood, *65
——Standard, *1125
——Tunnel lighting, *97
Incandescent lamps:
——Ballast resistances for voltage compensation. By Lauriol, (D.) 958
——Bloxam metallic filament, (D.) 909
——Candle-power determination. By Uppenborn, (D. R.) 1114
——Cazin patent, 500
——Cyclic temperature changes in filaments. By Sahulka, (D.) *803
——Experiments on ordinary carbon lamps. By Morris, (D.) 107
——Film lamp developed by Parker and Clark, *294
Incandescent lamps: (Continued.)
——Flicker, and variations in illumination. By Kennelly and Whiting, 1208, 1249
——Frosted lamps, Analysis of causes of candle-power diminution. By Millar, 777, 798.
——Frosted lamps, Reduction in the service life of. By Kennelly, 976, 987
——General discussion. By Swinburne, (D.) 1114
——Helion filament. By Parker and Clark, *10, 129, 138, 290
——High efficiency lamps, 624
——Kuzel one-watt colloid lamp, *1126
——Large lamps, Things to avoid with, 417
——Leading-in conductors. By Bastian, (D.), *1166
——Leading-in device, *583
——Life of carbon filament on varying voltages, 1147
——Luminous efficiency of, 535. By Russner, (D.) 554; Voege, 1144, (D.) 1166
——Mean horizontal intensity, Determining. By Uppenborn, 536; (D.) 555; Hyde and Cady, (D.) 908, 1248, 1260
——Metallic-filament, Effect on lighting industry. By Tatlow, (D.) 907
——Nernst lamp, Modified. By Nernst and Stockem, (D.) 1225
——Nernst, Ballast resistances of, as starting resistances for motors. By Kallmann, (D.) *1319
——New lamps, 129; (D.) 267; Swinburne, (D.) 310, 351; (D.) 467; Libesny, (D.) 601; (D.) 712
——New lamps and the small station. By Forest, 685
——Osmium, Experiments on. By Morris, (D.) 107
——Osram lamp, German, (D. R) 805
——Osram lamp, Low-voltage, (D.) 763
——Rating, New system of, 1171
——Selective radiation in. By Franklin, (D.) 107
——Standardizing specifications, 494
——Standardization of lamps, 975
——Standardization of, in Great Britain, 288; (D.) 311. By Wild, (D.) 515
——Switzerland, Testing in, (D.) 1226
——Tantalum, Experiments. By Morris, (D.) 107
——Temperature and light emission of carbon, osmium and tungsten lamps. By Grau, (D.) 933, 958
——Testing lamps. By Paterson, (D.) 467, 515, 555; Wild, (D.) 515
——Titanium filament, 334
——Tungsten lamps. By Clerici, (D.) 1225
German, (D.) 804
Heany patent, 12
Just-Hanaman, 1149
Thomson-Houston, (D.) 1038
Tungsten lamp in America, *867
Tungsten lamp patent, 780
——Various new lamps, (D.) 60
——Wane of the old standard, 330
——Zirconium-tungsten filament, (D.) 311
Indiana Engineering Society, 14
Indiana Independent Telephone Association, 1018
Indicator, New end-cell switch. By Radtke, *752
Indicator of pressure in a line, (D.) *911
Inductance, Mutual, discussed by Rosa, 9
Inductance coefficients. By Russell, (D. R.) 647, 943; Emde and Blondel, (D. R.) 647
Inductance measurements. By Taylor, (D.) *1000
Induction between parallel wires. By Shepardson, (D. R.) 269
Induction coils:
——Construction. By Eddy, *244
——Design of. By Ehnert, (D. R.) 1040, 1170, 1228
——Design of a 12-inch coil. By Eddy, *40, 228
Induction potential regulators. By Fernandez, *688
Industrial schools, 178
Injector, Automatic, *1003
Instruments, Various new. By Armagnat, (D. R.) 912
Insulating materials, Two, in series, Electric force and perforation strength. By Benischke, (D.) 396
Insulation:
——General discussion. By Williams, (D.) 959
——Lima sectional high voltage, *1124
——Measurements of wire and cable insulation, 581; by Wachter, 593; Wolcott, 643; Waring, 775, 795; Pardee, 801
Insulation resistance and capacity of different conductors. By Sahulka, (D. R.) 1040, (D.) 1170
Insulator pins, Strength of, *1292
Insulators:
——Ambroin, *104, *607
——Baum high-tension, *191
——Clark wire, *418
——Fastening. By Egner, (D.) 714
——German high-tension, for railways, *104, *607
——Hanging high-tension. By Falch, *454
——High-tension, 1310
——High-tension porcelain, *847
——High-voltage railway, (D.) 352
——Location of broken. By Nicholson, *1309
——60,000-volt insulator, *183
——Steinberger high-tension, *1122
——Tests of high-tension. By Weicker, (D.) 844
Insurance, Electrical, 136
International Association of Municipal Electricians, 1151
International Independent Telephone Association, 174, 743, 1219, 1233
International Radio-Telegraphic Convention, 83, 88
Interpoles:
——Arrangement of. By Pelikan, (D.) *554
——Calculation of. By Ellis, (D. R.) 310
——Commutation and. By Page and Hiss, (D.) *1318

* indicates illustrated articles.

Interpoles: (Continued.)
——Direct-current design as influenced by. By Page and Hiss, (D. R.) 1270
——Principles of. By McMullin, (D. R.) 1318
Interrupters:
——Ammon. By Canter, (D.) *1228
——Rotary, for capacity measurements. By Kurlbaum and Jaeger, (D.) *193
——Sparkless. By Goldschmidt, (D.) 313
Inventions:
——Legal requirement of novelty in, 879
——Tests for determining presence of. By Brady, 692
——Utility of. By Brady, 1095
——What constitutes. By Brady, 444
——When worth patenting. By Tobler, 239
——Working models of. By Tobler, 698
Inventions wanted. By Thatcher, 259
Inventors, Advice to. By Dixon, 239
Ionization. By Davis (D. R.) 193
Ionization, Spontaneous, 1064
Ionization of air in vessels. By Wood and Campbell (D.) 603
Ionization of the atmospqhere over the ocean. By Eve, (D.) 603
Ionization of fused salts. By Goodwin and Wentworth, (D.) 150
Ionization of gases and vapors by alpha rays. By Bragg, (D.) 647
Iowa Electrical Association, 628, 630, 819, 838, 847
Iron losses in non-synchronous machinery. By Wall, (D.) 600
Iron tests. By Fortin, (D. R.) 912
Iron under small periodic magnetizing forces. By Baldwin, (D.) 556
Isolated plant as non-peak load, 331
Isolated plants:
——Regulation in. By Bell, 435
——University of Minnesota. By Estep, *990

Railway engineering. By Carter, (D.) 1039
Railway passes for telegraphers, 14
Railway rates, Western, 228
Railway regulation by the national government, 828
Railways, Electric:
——Albuquerque, N. M., 1200-volt, direct-current, *391
——Alternating-current traction, (D.) 764
——Budapest and Vienna, 1298
——Catenary line work, *642
——Direct-current traction development, (D.) 1227
——Freight railway south of Dresden. By Schauer, (D.) 998
——Frequency, Choice of. By Scott, (D.) 645
——Gt. Britain, Statistical data, (D.) 396
——Greece, Athens to Piræus, (D.) 352
——Harrisburg, Pa., power plant, *829
——Italy:
Equipment of steam roads, (D) 108
Milan to Lugano, 93
State railways. By Krüger, (D.) 997
——Japan projects, 93
——Johannesburg, (D. R.) 959
——Liverpool, Report, (D.) 910
——London underground schemes, 92; (D. R.) 193, 1168
——London tramways, 294
——Mass., Statistics for 1906, 88
——Matterhorn scheme, 424
——Milan to Genoa, 784
——Milwaukee Northern, 1042
——Multiple-unit system on English line, (D.) 958
——N. Y. C. Bronx accident, 494, 537, 539, 674
——New York State, Statistics, 223
——Prussian regulations, (D. R.) 469
——Regenerative control system. By Raworth, (D.) 108
——Review of the situation, 4
——Rio de Janeiro elevated, 227
——Single-phase system. By Stillwell and Putnam, 215; Whitehead, 393
Berlin. By Reichel, (D.) 910, 998, 1319
Built by Siemens-Schuckert Co., (D.) 998
France, Westinghouse system, (D.) 555
Hamburg-Altona, (D. R.) 842
Italy, (D.) 1039
Review of roads in operation, (D.) 192
Swedish railways, (D.) 1038
Vs. direct current for traction. By Hobart, (D.) 1167
——Southern development, 228
——Surface-contact at Oxford, (D. R.) 1318
——Switzerland, mountain roads. By Mueller (D.) 842; Herzog, (D.) 998
——Third-rail construction. Defects in. By Goolding, (D.) *268
——Three-phase traction. By Werner (D.) 1227
——Three-wire system for traction, (D.) 193
——Trunk line operation discussed by F. J. Sprague, 1020
——Voltage, Prospects of increased, 933
Railways, Steam:
——Comparison of steam and electricity. By Werner, (D.) 555
——Electrification of roads. By Ward Leonard, 552; (D. R.) 805; Dawson, (D.) 958, 1115; Cserhati, (D.) 1318
——Erie, 175
——Harriman on electric traction, 538
——Substitution of electric motor for steam. By Stillwell, Putnam, Sprague and others, 224
——Switzerland, Electricity, (D.) 1318
Rateau process for utilization of exhaust steam, 560
Rates. (See Charging for electric current.)
Rays of positive electricity. By Thomson, (D.) 1039
Reactance in alternating current circuits, Graphical diagram for determining. By Varley, 301
Rectifier, De Faria electrolytic (D.) *62
Rectifier for alternating currents. By Wehnelt, (D.) *192
Rectifier for electric locomotives, *103
Refrigerating plants. By Barnard, (D.) 712
Refrigeration:
——Cooling ice box without ice, 58
——Electric, at Thompson's Spa, Boston, 951, *1020
——Mechanical, and the central station, *991
——Refrigeration and power production, 102

* indicates illustrated articles.

Regenerative control of cars. By Raworth, (D.) 108
Regulation in isolated plants. By Bell, 435
Regulators, Induction potential. By Fernandez, *688
Repair-shop face plate. By Hansen, *896
Repair-shop suggestions. By Weeks, *444
Research fellowships in engineering, 496
Resistance:
——Calculations with slide rule. By Woodbury, *249
——Comparison of, by Kelvin method. By Moore, (D. R.) 151
——Electric, and magnetism. By Adams, (D. R.) 1227
——Electrolytic, and capacity, Determining. By Taylor, (D.) 1228
Resistivity-temperature coefficient of metals. By Pender, 739, 756
Resistivity-temperature formulæ for copper. By Crocker, 374, 385; Jasse, (D.) 999; Glazebrook and Kloss (D.) 1039
Resonance phenomena. By Hemsalech and Tissot, (D. R.) 765
Rheostats:
——Design of. By Hallock, (D.) 518
——Motor-starting, Underwriters' rules. By Hanchett, 580, 583
——Water rheostats. By Bernard, (D. R.) 603
Ridgway Dynamo & Engine Co., 356
Ring discharge. By Davis, (D. R.) 647
Robbins & Myers Co., 562
Rock crushers, Motor-driven, *846
Roentgen rays. By Thomson, (D.) 714
——Dangers, 747
——Transmission of, through metallic sheets. By Adams, (D.) 646, 1040
Roller bearings. By Rennerfelt, *1100
Rolling mills, Electric. By Brown, (D.) 468; Bigge, (D.) 1226, 1271
Rope, Wire, Testing cross-section of (D.) 1273
Rossmassler-Bonine Electric Co., 473
Roth Bros. & Co., 65, 198, 271
Russell Engine Co., 112
Rutherford, Prof. Ernest, 138

## S

Safety devices, Exposition of, 94, 226, 622
Safety regulations for electric systems in Vienna, (D. R.) 764
Salt, Plant for electrolysis of. By Crocker, (D. R.) 353
Salt solutions, Susceptibility of mixtures of. By McLennan and Wright, (D.) 765
Sarco Co., 609
Saw mills, Electric power in. By Reiner, (D.) 395
Searchlight. By Koenig, (D. R.) 311
Searchlight with shadow in centre. By Hall, (D.) 712
Selenium:
——Compensating inertia of. By Korn, (D.) 470
——Investigation of. By Schrott, (D.) 396
——Selenium in photometry. By von Schrott, (D.) 844
Selenium cells:
——Behavior of. By Pochettino and Trabacchi, (D. R.) 805
——Electrolytic (D.) 1273
Self-inductance of straight conductors and rectangular coils. By Sumec, (D.) 151
Self-induction, Measuring the coefficient of. By Zeleny, (D.) 766
Sewage pumping plant at Salem, Mass., (D. R.) 517
Sewage purification: Sterilization of effluents. By Phelps and Carpenter, (D.) 312
Shaft sinking plant, Electric, (D.) 352
Shaper, Motor-driven, *560
Shaw, Bernard, in the electrical field, 133
Ships, Magnetic character of. By Barthing, (D.) 1321
Shoe-shining by electricity, 59
Shops and factories:
——Curtain factory at West Newton, Mass., *390
——English textile mills, (D.) 712
——Flour mill at Dunston-on-Tyne, (D.) 192
——Havana induction motor installations, *521
——Japan paper mill, 807
——Joslyn Mfg. Co., 640
——Lignite briquet factory in Germany. By Krumbiegel, (D. R.) 805
——Motive power for shops. By Mathot, (D. R.) 311
——Motor installation in machine shop. By Bowne, 260
——New York Edison Co., *589
——Rolling mills. By Brown, (D.) 468, 645
——Saw mills, Power in. By Reiner, (D.) 395
——Shops for printing fabrics. By Arbeiter, (D.) 842
——Siemens & Halske Co. By Hennig, (D. R.) 195
——West Virginia Pulp and Paper Co., Equipment, *297
Shutter for electric fans, *521
Siemens Brothers, England, *113
Signals, Electric light, for factories. By Drummond, (D. R.) 557
Signals, Mine. By Wolff, (D. R.) 195
Signals, Railway:
——Automatic electric for railways. By Brown, (D.) 195
——Interlocking systems. By Willson, (D. R.) 195; Taylor, (D.) 844
——Locomotive signals, (D.) 716
——Night signals, 936
——Penn. R. R., New system, *595
——Safe railway, 137
Signals, Railway: (Continued.)
——Train staff system. By Patenall, (D. R.) 998, 1319
——Various systems. By Cadwallader, (D. R.) 648
Signals, Submarine:
——Bells on Atlantic coast, 294
——Development of, by means of sound, (D.) 354
——Finding direction by means of. By Blake, 739, 754
Signals for warship turrets, (D.) 1320
Signs, Electric:
——"Anna Held," *397
——Buffalo signs. By Ames, *901
——Churches, 1255
——Cleveland Electric Ill. Co., *265
——Day and night circular, *356
——Good and bad signs. By Beckwith, *54
——Lincoln, Neb., *465
——Morgan & Wright, *474
——Outline lighting. By Honeywell, 263
——Underwriters' rules governing signs, 867
Singing arcs, *720
Slate quarries, Hydro-electric plant for, in Wales, *749
Slide rule for resistance calculations. By Woodbury, *249
Slide rule for special calculations, *756
Smoke prevention. By Kershaw, (D.) 909
Smoke production, Influence of central station loads. By Lucke, (D. R.) 645
Smoothing roll for armature disks, *64
Socket, "Security Snap," *398
Sodium as an electric conductor. By Betts, 147
Soldering fluid, Universal. By McFarley, 896
Southwestern Electric & Gas Association Convention, 1093
Spark discharge in gases and vapors. By Almy, (D.) 149
Spark discharges through a high vacuum. By Madelung, (D.) 646
Spark potentials in liquid dielectrics. By Shaw, (D. R.) 603
Sparking:
——Calculation of sparking characteristics. By Kennedy, 330, 344, 762; Poole, 515
——Difficulties, 1106
——Latour schemes for prevention of, *306; By Lundell, 514
——Prevention of in single-phase motors, McAllister method, *1019
——Preventive resistances with interlaced armature windings, *346
Speed changes in generators, Determining small rate of. By Young, *551
Speed-time curves, Plotting of. By Langsdorf, 977, 989
Spelling, Simplified, and the technical man. By Waring, 1015, 1033, 1269; Matthews, 1165
Spikes, Shearing of by locomotives, 539
Sprague Electric Co., 563, 768
Stackpole Battery Co., 357
Standard Electric & Chemical Co., 1125
Stanislaus Electric Power Co., 154
Staple, Insulating, *689
State legislation, Season of, 375
Static electricity, Neutralizing, 379
Statistics of electrical development, 1060
Stayright Electric Fixture Mfg. Co., 558
Steam gauges, Adjusting. By Hobart, *258
Steam power. By Ennis, (D. R.) 1271
Steam pressure regulator, Electric, (D.) *713
Steam trap, Preventing dirt from entering. By Thomas, *49
Steam trap troubles. By Hobart, *1105
Steam turbines:
——Curtis, Development of, 1211
——De Laval, Operation of. By Foote, 701
——Rateau-Ballwood, *605
Steamer, Cable, Japanese, (D. R.) 1229
Sterilization of effluents. By Phelps and Carpenter, (D.) 312
Sterling Electrical Mfg. Co., 1171
Stokers, Mechanical, in burning bituminous slack and lignites. By Hutchins, *45
Storage batteries:
——Bijur plate, *146, 761
Storage of energy. By Lopper, (D.) 1271
——Discussion of, 625
——"E. I. T.," superior to ordinary lead cell, (D.) 150
——General use of, 84
——Gould plates, 649
——Gould "tandem couple," *608
——Improvements. By Lyndon, (D.) 469
——Landsing plate, *146
——Lead accumulator from a manufacturing point of view. By Vicarey, (D.) 149
——Properties of. By Karapetoff, (D.) 1320
——Telephony, Use of, in. By Papson, *547
——Three-phase system and the storage battery in German salt factory, (D) *108
——Tudor batteries, (D) 519
——Zoar, *915
Stow Mfg. Co., *154
Sturtevant, B. F., Co., 199, 565
Stuyvesant theater, New York, 869
Submarine boat tests, 1200
Sub-stations:
——Berlin. By Heilfron, (D.) 805
——Chicago, for arc circuits, *759
——Lackawanna Steel Co. By (D.) Parker, (D.) 269
——Portable, *1326
——Potomac Electric Power Co., Wash., D. C., *1067
——Wellesley, Mass., *389, 554
Subways:
——Boston projects, 227
——New York projects, 13, 178, 225, 868
Superheated steam, Use of. By Bolton, (D.) 555
Swedish electrical combine, (D.) 152
Swiss electrical engineers' convention, (D.) 195
Switch gear, Relays for control of high-tension. By Garrard, (D.) *1116
Switchboards:
——First telephone board, 332
——Hanover Institute Technology. By Beckmann, (D. R.) 312
——High-tension practice. By Hayes, 1310
——Modern devices, *36
——Remote control. By Walker, (D. R.) 911
Switches:
——Anderson electric time switch, *154
——Arc circuit switch, *1001
——Change-over switch problems. By Denton, 592
——Hartman automatic, *721
——Installation of double and single pole, 937
——Remote control rheostat, *64
——Spark on circuit under no-load, 900
——Voltmeter, Multiple scale *67
Switching scheme for balanced three-phase low-tension lighting system. By Corcoran, *36
Synchroscope. By Cohen, *887
Syracuse Lighting Co., 418

## T

Tantalum, Purification of, (D.) 1318
Tapping machine, Garvin, *560
Taxameter cabs for New York, 674
Technical graduates and central stations. By Shepardson, 29; 56, 170, 216; Eglin, Jackson, Wells, Norris, Frueauff, Langsdorf, Carson, Caldwell, Brooks, 225; Spinney, 350; Doherty, 580, 596
Technical man and simplified spelling. By Waring, 1015, 1033, 1269; Matthews, 1165
Technical Publicity Association, 295, 867
Technical Welfare Work in Brooklyn, 1250
Telautography. By Korn, (D. R.) 844
Telegraph poles, Concrete. By Cellar, *1305
Telegraph rates, 295, 663, 672
Telegraphers' strike, 1296
Telegraphy:
——Automatic telegraphic transmission, 937
——Belgium, 1199
——Crehore and Squire automatic high-speed system, 1064
——Desert of Sahara, 588
——India, Baudot system in. By Williams, (D. R.) 806
——Inductive disturbances, 1313
——Lincoln and telegraphy, 869
——Photographs, Transmission of. By Korn, (D. R.) 557
——Quadruplex, Improvement in, 781
——Rowland system, 784
——Rugh composite system, *307
——Steno-telegraphy, (D.) 1171
Telephone cables:
——Bavarian Mountains. By Hintermayr, (D. R.) 1001
——Loaded, across Lake Constance, (D.) 1228
——On transmission line poles, 261
Telephone engineering, 82
Telephone hooks:
——Foster, *307
——Manson, *350
Telephone junction boxes, Cook, 271
Telephone magnet, Harrison and Haslett, *759
Telephone patents, 105, 147, 191, 307, 349, 392, 553, 598, 643, 759, 800, 840, 956, 1036, 1163, 1223, 1269, 1316
Telephone receivers:
——Challen, *554
——Steinberger, *105
——Theory of. By Poincaré, (D. R.) 557, 806
——Turner, *840
Telephone repeaters:
——Design of. By Cohen, 691
——Warth, 1224
Telephone transmitter, Fahrenfeld, *105
Telephone wire plant, 860, 865
Telephones:
——Efficiency of. By Abraham, (D.) 1171
——Lanz ground connection, *147
Telephonic transmission measurements. By Cohen and Shepherd, (D.) 1170
Telephony:
——Adams-Randall calling system, *350
——Alaska, 338
——Andriano system, *840
——Argument by telephone, 227
——Bavarian underground cable system. By Schreiber, (D. R.) 151
——Boston matters, 1255
——Breslau exchange. By Langbein, (D. R.) 844
——Central battery system. By Neuhold, (D. R.) 354
——Central energy automatic system, American, *1042
——Chicago, 1200
——Cook protector, *302
——Dean intercommunicating system, *553
——Dean party line apparatus, *308
——Developments. By Knowlton, 638
——Development of telephone service. By DeLand, (D. R.) 151
——Dunbar two-wire circuit, *393
——Europe, Development in, 335
——Forest telephony in Western states, 1255
——France, 178
——Funeral over telephone, 227
——Gt. Britain, statistics, 418
——Grounding each telephone, 457
——Independent telephonists, 174

* indicates illustrated articles.

Telephony: (Continued.)
——Independent, History of. By Hoge, (D. R.) 195
——Italian service, 13
——Line engineering discussed by Woodbury, 9
——Lines in snow, (D.) 313, 254
——M'Berty signaling system, *956
——Measurements of currents on telephone circuits, 977
——Multiple telephony. By Maior, (D.) *1228
——Multiplex telephony. By Walden, 549
——New York matters, 94, 1298
——Ohio matters, 1021
——Paddington exchange. By Laidlaw, (D.) 1001
——Paris, Conditions in, 93
——Railway service, 422
——Rugh composite system, *307
——Statistics for 1906, 619, 622
——Storage battery in telephony. By Paxson, *547
——Train telephony, 14
——Transmission by means of underground cables. By Hiecke, (D.) 1274
——Transmission measurements, (D.) 1274
——Worcester, Mass., exchange, 291
——Worth repeater system, *643
Teilharmonium:
——Concerts, 136
——Demonstration, 8
——Electrical features. By McAllister, *22
——Franchises, 1298
Temperature, Thermodynamic scale of. By Buckingham, (D.) 1321
Temperature rise in dynamo-electric machinery, Measuring. By Loppe, (D. R.) 106
Temperature scales. By Holborn and Valentiner, (D.) 470
Tesla, Letter from, 1294
Test lamp, Pocket *913
Testing apparatus, High-frequency. By Carpenter, *452
Testing instruments for incandescent lamps, German, *718
Testing of materials for construction of electrical machinery. By Epstein, (D.) 109
Testing set, Decade, *609
Thermometer, Electric, for medical purposes, (D.) 805
Thermometers, Types of. By Whipple, (D. R.) 354
Thomson scholarships, 673
Tidal power in Maine, 227
Time intervals, Electric measurement of. By Devaux-Charbonvel, (D.) *194
Time-meters for tramways. By Wagmueller, (D.) *647
Toggle, Alpha and Omega, *475
Tool chest and the mechanic. By Rafferty, 1101
Tool steels, Evolution of high-speed. By Norris, (D. R.) 1001
Towers, Transmission:
——Canadian Niagara Power Co., *1300
——High-tension, 870
——Southern Power Co., *1028
——In Switzerland, (D.)*312
Track construction. By Dubs, (D.) 352, 555
Train lighting, Electric, in Germany, (D.) 997
Training of electrical artisans. By Cummins, (D. R.) 1229
Transformer indicator diagrams. By Lyle, (D.) 841
Transformer patent litigation, 934
Transformer station, Transportable. By Cserhati, (D. R.) 805
Transformers:
——Connections for 60-cycle power service. By Gear, *895
——Cooling, by forced oil circulation, 1222, *1230
——Flexible construction, Pekler, *293
——Hysteretic loss, Measuring. By Kapp, 664. *(D.) *711
——Insulating sheets of core, 261
——Loading, Artificial. By Gustrin, (D.) 1321
——Protection of. By Kintner and Moody, 1308
——Regulation of constant-current, 900
——Resonance transformers. By Benischke, (D.) 267
——Series transformers. By Taylor, (D.) 843
——Testing. By Reid, (D. R.) 470
——Three-phase and one-phase, Comparison. By Tobey, 1221
——Three-phase, vs. groups of three single-phase transformeres. By McAllister, 287, *302
Transmission of electric current:
——Direct-current series system. By Highfield, (D. R.) 713, (D.) 764
——Economical spans. By Scholes, 1308
——Economics. By Baum, 1310
